💼 Experience

- **Participate innovesta group project(2023)**

📄 Projects

Blog website

The Blog Website is a secure and interactive platform that allows users to create and share posts with images or videos, manage their profiles, and explore content through powerful search features. It supports JWT-based authentication for safe access, while users can update or delete their own posts and discover others easily. Admins are given tools to manage users and maintain the community, making the platform both user-friendly and well-structured for smooth content sharing.

Groovo music app

The cafe management system is built with Node Js and MongoDB for the backend, using JWT for authentication. The frontend is developed with React and daisyui. Users can manage the menu by adding, deleting, and updating items, apply discounts, upload images, and handle order management efficiently

Chat App

The chat app, built with React and MongoDB, supports real-time messaging with text, emojis, and images using Socket.io. It ensures secure JWT authentication, message editing, and deletion. Messages persist in MongoDB, with Cloudinary for image storage. Powered by Node.js and WebSockets, it offers a fast, secure, and interactive experience

🎓 Education

BSc in Computer Science
IJSE panadura — 2023 present

G.C.E.A/L - Matematics Stream
St . Jhon's College Panadura — 2020

G.C.E.O/L
St . Jhon's College Panadura — 2017
